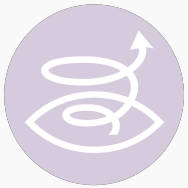
What makes Suprelle® so unique:

Down like touch
Designed to match the unique characteristics of real down. It offers outstanding thermal insulation in duvets and soft, supportive comfort in pillows.

Ultra Softness
Unique softness comes from its ultra fine, short and supple fibers.



Slow Release
Constantly adjusts to your sleep patterns, with a slow release effect all night long.

Keeps its shape
Fluffing up your pillow and duvet allows Suprelle® Micro to keep its shape and maximize its lifespan.

Our Pledge:

Cuddle Down Products is dedicated to creating, manufacturing and finding the highest quality products that we can provide at the best possible prices.

We will ensure we service you, our customer to the best of our ability every day.

Suprelle® MICRO

Ultra soft, down like touch

SUPRELLE®

Making smart investments in your sleep

CUDDLE DOWN

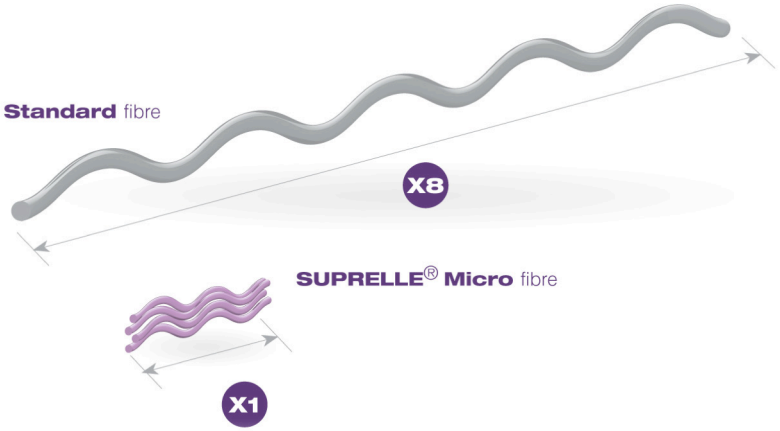
The closets product to down… that isn't down

If you have ever slept under a down duvet or with a down pillow you know it is the epitome of a luxurious sleep.

However, there are some who, for cost or allergy reasons, prefer a synthetic option. Therefore, Cuddle Down has searched the globe to find the softest, fluffiest and most comfortable polyester fiber we have ever seen.

Don't just take our word for it, the science explains why.

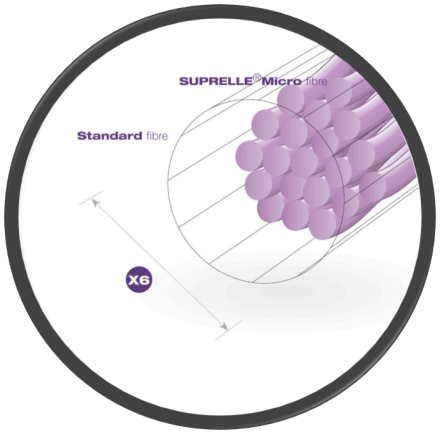
Shorter Fiber



Supprelle® Micro is 8X shorter than standard fibers

This allows Suprelle® to slide freely around itself, increasing its softness and decreasing the chance of tangles or clumps

Thinner/Lighter Fiber

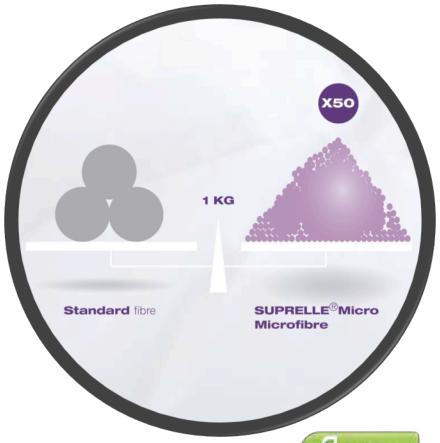


Suprelle® Micro is 6X thinner than standard fibers

This allows for 50X more fibers in 1 KG of filling. The results:

Pillows

A softer pillow that keeps its shape with improved rebound



Duvets

A fluffier, warmer duvet with remarkable down like feel

Suprelle MICRO
